ABSTRACT

The tables present faculty salary data in academic year 1967-68, including for the first time an approximation of the total annual income of geographic full-time faculty. The report is based on the salary information reported by 61 U.S. medical schools, of which 51 reported salaries for strict full-time faculty, 27 reported the base salaries paid to geographic full-time faculty, and 17 reported the approximate total annual income of geographic full-time faculty. A series of three tables is provided for each major clinical department and for the combined basic science departments, presenting the frequency distributions of strict full-time salary, geographic base salary, and geographic total income. The base salary and total income data for geographic full-time faculty should be considered as less representative or reliable than the data for strict full-time salary. (Author/LBH)

MEMORANDUM #67-A16

TO: Deans of the United States Medical Schools

FROM: Lee Powers, M.D.
Associate Director, AAMC

SUBJECT: Salary Data (1967-68)

The attached tables present faculty salary data in academic year 1967-68 including for the first time an approximation of the total annual income of geographic full-time faculty.

This report is based on the salary information reported by 61 U.S. medical schools of which 51 schools reported salaries for strict full-time faculty, 27 schools reported the base salaries paid to geographic full-time faculty, and 17 schools reported the approximate total annual income of geographic full-time faculty.

A series of 3 tables is provided for each major clinical department and for the combined basic science departments presenting the frequency distributions of strict full-time salary, geographic base salary, and geographic total income.

The base salary and total income data for geographic full-time faculty should be considered as less representative or reliable than is the data for strict full-time salary. Income based entirely on a single salary source can be readily obtained, compared, and analyzed while many complex arrangements governing the income permitted to geographic full-time faculty make data collecting and comparisons difficult. The small number of individuals represented in some categories further diminish the reliability of the dollar amounts reported.
